

# GLOBAL EQUITY MODEL PORTFOLIO USD

APRIL 2024 Published on 28 May 24

This document is a Minimum Disclosure Document (MDD) which contains key information about this Portfolio. This MDD will be updated on a monthly basis. This MDD applies to the non-unitised version of this Portfolio available on the Glacier International platform. Other versions on other platforms may be available.

This Portfolio is suitable for investors with a high-risk profile who are looking for a global equity solution with a USD mind-set managed by multiple managers.

## OBJECTIVE

The objective of this portfolio is to deliver long-term capital growth.

## INVESTMENT STRATEGY

The portfolio aims to outperform the MSCI World Index over a rolling 5-year period.

## HOLDINGS

## CURRENCY ALLOCATION

## CHARACTERISTICS

Investments to be included in the portfolio will, apart from assets in liquid form, consist solely of participatory interests and other forms of participation in portfolios of foreign collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager of a sufficient standard to provide investor protection which is at least equivalent to that in South Africa.

## ADDITIONAL INFORMATION

- The annual fee referred to above includes the annual fee of 0.23% payable to NFB Asset Management.
- The Portfolio Manager shall reserve the right to close the Portfolio to new investors on a date determined by the Portfolio Manager.
- In order to consolidate and aggregate NFB's activities one NFB portfolio may invest in another NFB portfolio. NFB will not earn additional fees as a result of such investments.
- In certain instances the FSP recommending the Portfolio may be a related party to the Portfolio Manager. In such instances the FSP and/or Portfolio Manager may earn fees in addition to those disclosed here. It is the FSP's responsibility to disclose such fees.
- All data is sourced from NFB Asset Management.
- Performance data on this MDD excludes any portfolio management, administration and advice fees. Performance data does include costs implicit in the underlying holdings.

## RISK / REWARD PROFILE

### HIGH

Typically, the lower the risk the lower the potential return and the higher the risk the higher the potential return. There is no guarantee that returns will be higher in a portfolio with a higher risk profile. The minimum equity exposure will be 80% and the maximum will be 100%.

### RISKS

**Market Risk** - Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment.

**Currency/Foreign Exchange Risk** - This risk is associated with investments that are denominated in currencies different from the Portfolio's currency. When these currencies fluctuate against each other the investments face currency gains or losses.

**Concentration Risk** - This Portfolio pools the assets of many investors and uses the proceeds to buy a portfolio of assets. There are regulations in place that limit the amount that may be invested in securities, asset classes and/or companies, thereby spreading the risk.

**Liquidity Risk** - This relates to the ability of the Portfolio to trade out of an investment held in the Portfolio at or near to its face value. This may impact on liquidity and, in the case of foreign investments, on the repatriation of funds.

**Credit Risk** - Credit risk is where an issuer of a non-equity security may not be able to make interest payments and/or capital repayments. This may impact the value of the Portfolio.

**Inflation Risk** - The risk of potential loss in the purchasing power of your investment due to a general increase of consumer prices.

**Political Risk** - The risk that investment returns could suffer as a result of a country's political changes or instability in the country. Instability could come from changes in the country's government, policy makers or military.

**Tax Risk** - This risk relates to any change to tax laws or to the interpretation of existing tax laws which has an impact on the manner in which this Portfolio is taxed.

**Compliance Risk** - This refers to the risk of not complying with the legislation, regulations, prescribed investment limits and internal policies and procedures by the Manager or the Portfolio Manager.
