## RISK / REWARD PROFILE

### MEDIUM TO HIGH

Typically, the lower the risk the lower the potential return and the higher the risk the higher the potential return. There is no guarantee that returns will be higher in a portfolio with a higher risk profile. The risk profile for this Portfolio is rated as medium to high as it may invest up to 100% in equities.

## RISKS

**Market Risk** - Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment.

**Currency/Foreign Exchange Risk** - This risk is associated with investments that are denominated in currencies different from the Portfolio's currency. When these currencies fluctuate against each other the investments face currency gains or losses.

**Concentration Risk** - This Portfolio pools the assets of many investors and uses the proceeds to buy a portfolio of assets. There are regulations in place that limit the amount that may be invested in securities, asset classes and/or companies, thereby spreading the risk.

**Liquidity Risk** - This relates to the ability of the Portfolio to trade out of an investment held in the Portfolio at or near to its face value. This may impact on liquidity and, in the case of foreign investments, on the repatriation of funds.

**Credit Risk** - Credit risk is where an issuer of a non-equity security may not be able to make interest payments and/or capital repayments. This may impact the value of the Portfolio.

**Inflation Risk** - The risk of potential loss in the purchasing power of your investment due to a general increase of consumer prices.

**Political Risk** - The risk that investment returns could suffer as a result of a country's political changes or instability in the country. Instability could come from changes in the country's government, policy makers or military.

**Tax Risk** - This risk relates to any change to tax laws or to the interpretation of existing tax laws which has an impact on the manner in which this Portfolio is taxed.

**Compliance Risk** - This refers to the risk of not complying with the legislation, regulations, prescribed investment limits and internal policies and procedures by the Manager or the Portfolio Manager.
